

Persona - Isaac Chung

Age: 58

Gender: Male

Occupation: Warehouse supervisor

Personality:

Isaac is a man that is cautious, patient, and prefers stability. He avoids unfamiliar technology and feels more comfortable with straightforward, predictable tools. He values clarity, simplicity, and step by step guidance.

Skills:

- Basic smartphone use (calls, texts, simple apps)
- Strong practical and hands on skills from warehouse work
- Limited digital literacy
- No prior experience with AI or investing

Environment:

Isaac lives alone in a small apartment near the warehouse where he works. His routine is structured: early shifts, grocery stops, and quiet evenings at home. He rarely tries new apps and often asks his daughter for help with anything technical. She recently encouraged him to try an AI financial advisor. He is willing to try, but feels intimidated by using a tool he doesn't fully understand. His savings remain in a bank account because investing feels complicated.

Motivation To Use Our App:

Isaac wants to prepare for retirement and manage his savings more effectively. He is motivated by financial security, clear explanations, and tools that help him learn at a comfortable pace. He wants an advisor that feels simple, reliable, and easy to understand.

Persona - Walter Salamanca

Age: 32

Gender: Male

Occupation: Senior Software Engineer

Personality:

Walter is a man that is analytical, confident, and highly efficient. He enjoys solving problems logically and prefers tools that are fast, polished, and data oriented. He dislikes vague explanations and expects transparency in how recommendations are generated. He is comfortable experimenting with new technology but has little time for anything that feels slow, cluttered, or overly simplified

Skills:

- Advanced digital literacy
- Familiar with basic investing concepts but not experienced in portfolio construction
- Strong analytical and problem solving skills
- Comfortable using AI tools and automation
- Limited time for financial research due to a demanding job

Environment:

Walter lives in a downtown condo close to his workplace. His schedule is busy, split between long work hours, gym sessions, and occasional social outings. He earns a high salary and has stable savings, but most of his money sits in a high interest account because he has not taken the time to build a proper investment strategy. He wants to invest but does not want to go through long reports or marketing heavy financial apps.

Motivation To Use Our App:

Walter wants to grow his wealth efficiently without spending hours researching funds or comparing products across multiple platforms. He is motivated by tools that provide clear, data driven insights and remove marketing bias from investment decisions. He wants an advisor that can quickly analyze performance, suggest optimized ETF or mutual fund allocations, and present information in a clean, professional interface. Thus, he wants a system that respects his time, gives him control, and helps him make confident investment decisions.
